iPhone Rumors! - Audience participation required!

iPhone “7s and 7s plus”

- edge-to-edge display
- a vertical rear camera
- facial recognition capabilities
- a much improved processor
- wireless inductive charging.
- The new iPhone features a display similar in size to the display of the 5.5-inch iPhone 7 Plus, but with a body closer in size to the 4.7-inch iPhone 7.

iPhone 8

- OLED screen which is expensive could be the reason the rumored price could be \$1000-\$1600
- Face recognition instead of touch ID

A glyph that appears in the HomePod firmware could be the rumored iPhone 8.

MacRumors

WatchOS 4

Quick video showing the new features!

Apple Watch Series 3

- LTE Chip - so the watch relies less on the phone
- Some say similar design some say different design
- WatchOS 4 is supposed to use the battery more efficiently to balance having an LTE chip in the watch.

HomePod
